## POPULATION OF COLORADO.

The population of the State as returned in 1880 was 194,327; under the census of 1890 the returns show a population of 412,198, an increase of 217,871, or 112.12 per cent.

There have been numerous changes made in county lines since 1880. Twenty-four new counties have been organized from parts of counties then existing. Where decreases are shown in population of counties, it is generally caused by decrease in territory.

The following summary shows the population of each county according to the censuses of 1890 and 1880, and the increase or decrease during the decade:
